

CAREW COMMUNITY COUNCIL

ENVIRONMENTAL POLICY

CAREW COMMUNITY COUNCIL commits to ensuring that all activities carried out by the Council comply with all relevant legislation, both local and national. The Council is committed to the prevention of pollution and it aims to continuously improve its environmental performance through the support and involvement of its Councillors, and engagement with any other interested parties.

CAREW COMMUNITY COUNCIL aims to:

1. Actively minimise waste by reducing avoidable production of waste and reusing and recycling waste products wherever practicable.
2. Maximise efficient use of natural resources through relevant 'best practice' guidelines.
3. Operate a procurement system which ensures, so far as is practicable, that it purchases materials from recycled or sustainable sources.
4. Reduce the amount of energy consumed by efficient use of equipment and ensuring a 'switch off when not in use' policy is adhered to.
5. Continue to encourage everyone involved with the Council to adopt its environmental principles.
6. Review its Environmental Policy on an annual basis.
